

CONNECTING / OTHER CONNECTION TYPES / OVERVIEW

Tri-Clamp Connector 3C

The 3C Tri-Clamp connector is easy to use: Simply press the two flange-like connector pieces against each other and fasten them together using the locking clip. A sealing ring is situated between the connector pieces to maintain a proper seal. The resulting connection is form-fit and smooth and a wing nut on the locking clip makes it easy to quickly open and close the connection at any time. The Tri-Clamp connection can be combined with a 1+, 1A or 1C flexible tube connector, a 2N pipe connector or a male thread.

ADDITIONAL INFORMATION FOR CONNECTING

ADDITIONAL INFORMATION FOR TRI-CLAMP CONNECTOR 3C

FUNCTION: Connecting

CATEGORY: Other Connection Types

SERIES: Tri-Clamp Connector 3C

PRODUCT: [Dropdown]

13 PRODUCTS WERE FOUND

3C100B
Blind cover for Tri-Clamp connection (Series 3C)

3C100FG
Tri-Clamp connector (Series 3C) with female G-thread

3C100FL
Tri-Clamp connector (Series 3C) with female luerlock connection (Series 3L)

3C100MG
Tri-Clamp connector (Series 3C) with male G-thread

3C100ML
Tri-Clamp connector (Series 3C) with male luerlock connection (Series 3L)

3C100MN
Tri-Clamp connector (Series 3C) with male NPT-thread

3C100PN

Tri-Clamp connector (Series 3C) with connection for pipe (Series 2N)

3C100T+

Tri-Clamp connector (Series 3C) with connection for tube (Series 1+)

3C100TA

Tri-Clamp connector (Series 3C) with connection for tube (Series 1A)

3C100TB

Tri-Clamp connector (Series 3C) with connection for tube (Series 1B)

3C100TC

Tri-Clamp connector (Series 3C) with connection for tube (Series 1C)

3C100TT

Tri-Clamp connector (Series 3C) with barb connection for tube (Series 3T)

3C100W

Tri-Clamp connector (Series 3C) with welding adaption
